

CHEMISTRY EXCURSION

On Monday, October 14, Unit 2 Chemistry students from St Joseph's College Mildura went on an excursion to Analytical Laboratories & Technical Services Australia (AL TSA) South Merbein. The purpose of the visit was for students to tour the facility and to witness instruments of analysis used by AL TSA to analyse samples of soil, plant material and fruit provided by growers.

AL TSA is a world class facility that can analyse substances to levels as low as parts per trillion. St Joseph's College looks forward to enjoying an ongoing partnership with AL TSA.
