

SPEED DATE A SCIENTIST

Damascus College Ballarat recently held their 6th Annual Science Career Expo. This event involved Year 9 students listening to a speaker in small groups then rotating amongst six-nine speakers during the session. The speakers included past students and professionals from the Ballarat community.

The speakers talked about their profession and aimed to inspire the students to pursue careers in science, maths, technology, engineering, medicine and allied health. The expo made students aware of a range of careers and what subjects are recommended and what they have to study. Each student chatted to the professionals in a speed date type format. It was a fun and unique way to look at careers and subject choices for different pathways.
