

The launch of St Joseph's Primary School, Red Cliffs 1:1 iPad program will be a lasting memory as a sea of the devices captured the release of dozens of balloons to mark the special occasion on Friday, May 6.

Principal Mark Gibson said more than eighty iPads would be used on campus each day, with the increased access to technology encouraging teachers to incorporate new methods of learning into their lesson plans. "The idea behind the program is to provide students with opportunities that weren't previously possible," Mr Gibson said.
