

EARLY ACHIEVERS' PROGRAM AT ACU BALLARAT CAMPUS

Since 2013 Australian Catholic University (ACU) has offered the Early Achievers' Program to recognise incoming students who have made a positive community impact. The Program offers early entry and continued opportunities to build their volunteering and leadership experience with the support of ACU. The Program reflects the mission of ACU, and demonstrates the University's commitment to recognising community service and leadership.

ACU Early Achievers have participated in various kinds of voluntary service, from running fundraising campaigns for their school or church, to captaining sports teams, volunteering with St Vincent De Paul or as a surf lifesaver.

On February 22, during Orientation week, students who had successfully gained entry to ACU's Ballarat campus through the EAP were recognised in a special Welcome Reception on the Campus.

Associate Professor Joe Fleming, ACU Ballarat Campus Dean, welcomed students to the university, thanked them for their contribution and presented the students with certificates in recognition of their service. Student Development Coordinator, Claire White, shared with the students the various ways they could be of service while studying at ACU. Following the formalities there was a chance for the students and staff to interact and enjoy lunch together.
