

## Reflection on the Gospel-12<sup>th</sup> Sunday in Ordinary Time Year B (Mark 4:35-41)

Today's gospel story looks back to the parables that comprise the first part of the chapter and to the crowds that heard these parables: it is the evening of that same day. This story also looks forward as it marks the beginning of the second major section of Mark's gospel (4:35-8:21), a section that seems to be structured around a number of crossings of the lake, or Sea of Galilee. Jesus' decision to move with his disciples out of familiar territory is deliberate: "Let us go across..." The crossing itself is difficult, as is the challenge that confronts them on the other side of the lake. From the disciples' perspective, the seeming indifference of the sleeping Jesus is even more disturbing than the storm that threatens their safe crossing: "Do you not care...?" Jesus demonstrates that he does indeed care. From his perspective, the problem is with the fear in their hearts, a fear that is grounded in their lack of faith: "Why are you afraid? Have you still no faith?"

In the context of this Markan story, Jesus is like the sower in the parable (4:27-28) who goes to sleep and trusts that the seed will sprout and grow and bear fruit-which it does. Within a first-century Jewish context, Jesus' ability to "rebuke" the storm is a sign of divine power: in the Psalms, for instance, the God of Israel is the one who stills the roaring of the seas (Psalm 65:5) and controls the creatures that inhabit the waters (Psalm 89:9).

Today's first reading has insisted that God commands the sea and all of its moods. God the Birthing Mother presents Job with a series of rhetorical questions, reminding him and us that, while the sea may be threatening, it is God's new born infant, wrapped in God's swaddling clothes of darkness and cloud.

We read Mark's little story against the backdrop of the Hebrew Scriptures. We might also read it in light of contemporary science and so find within it a call to consider how our species respects or fails to respect and to nurture the fruit of God's womb, the cosmos. This story of the storm at sea is not an invitation to be complacent about the extreme weather events on our planet, trusting in God that all will be well. Such terrifying events can derive from the movement of tectonic plates over which we have no control. They can also derive from or be exacerbated by excessive carbon emissions. We pollute the atmosphere and make the seas to rise at our peril. Trust in God may involve relinquishing vested interests and engaging the processes that are designed to reverse the effects of human-induced climate change.
